# Central New Mexico Poultry Health Workshop

This program, hosted by Bernalillo County Extension Office, is made to support backyard poultry producers by providing practical, up-to-date education on key aspects of flock health and management. Participants will receive an update on Highly Pathogenic Avian Influenza (HPAI), learn essential biosecurity practices to help protect their birds, and explore proper nutrition strategies, with a focus on preparing poultry for show. The goal of this program is to encourage informed decision-making, strengthen everyday care practices, and help producers think more intentionally about the health, safety, and overall well-being of their flocks.

## Agenda

**5:00 PM – 5:05 PM**

### **Welcome & Introduction**

- Opening remarks
- Overview of program

**5:05 PM – 5:45 PM**
