

# Home Food Preservation: Pressure Canning

Contact: Madeline Gurney | [sandovalextension.nmsu.edu](mailto:sandovalextension.nmsu.edu) | 505-867-2582

**Saturday, June 13, 2026**

**9:00am – 12:00pm**

**Martha Liebert Public Library  
Bernalillo, NM**

Students must have taken a Friday evening “Home Food Preservation Science & Safety” class at least once to be able to take this class.

Pressure canning is a food preservation method used for low acid foods such as meat and vegetables. This method applies pressure and high temperatures to eliminate harmful microorganisms. Students will learn how to properly prepare pressure canned food and how to store these items based on different circumstances. The instructor will bring fresh ingredients to work with as well as all the utensils needed to make these products.

Please sign up for the class ahead of time to participate. Signups are available through the library. You can call the library at 505.867.1440 or register at this link: <https://bernalillolibrary.libcal.com/event/15802521>

If you are an individual with a disability who is in need of an auxiliary aid or service to participate, please contact Sandoval County Extension in advance at (505) 867-2582 or [sandoval@nmsu.edu](mailto:sandoval@nmsu.edu).

New Mexico State University is an equal opportunity employer and educator.
